1. Applicant's arguments, filed 4/24/2008, with respect to claims 1-3, 5-10, 12-28 have been fully considered and are persuasive. The rejection has been withdrawn.

Authorization for this examiner's amendment was given in a telephone interview with David R. Kemeny (Reg. No. 57,241) on 7/16/2008.

(Please note that deleted words are shown in strikethrough and added words are shown in underline).

Regarding independent claim 18, the prior art of record fails to teach or fairly suggest the combination of all limitations of claim 18 that includes **“a controller that controls the corrector so as to move the corrector toward an optical axis of the photographing optical system and hold the corrector at a constant position during a movement of the flash device to the first position in the correction disabled state by supplying power to the corrector.”**

Regarding independent claim 23, the prior art of record fails to teach or fairly suggest the combination of all limitations of claim 23 that includes **“supplying power to the corrector to move the corrector to the position relating to the optical axis and to hold the corrector at a position in the correction disabled state during the movement of the flash device.”**

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
